Generation MAST tower system aluminium span tower

A safe, secure and strong aluminium tower, which is exceptionally easy to erect using a minimum number of lightweight components.

advantages

safe - A wide range of individual component safety features combine to make a tower that meets all standards and regulations including HD1004 and the health and safety at work act.

Mast is manufactured to the highest international standards.

fast - The minimum number of lightweight components have been designed to quickly and positively locate without unnecessary clips and pins.

easy - Height calculation, assembly, adjustment, movement and disassembly are all made easy by using less components and their simplicity, light weight and ease of use.

economical - Wide ranging compliance and quality assurance guarantees value for money and long term durability

product features

Conical head spigot
All aluminium lightweight retaining collar for adjustable leg
Unique integral ladder frame (patent pending)
Self-priming braces
Full compliance with international product and safety legislation requirements

1.45m frame permits full bracing options
Universal base and guardrail frames
500mm centre rungs
Protected edges on all platforms
Automatic wind uplift prevention catch on all platforms
