# Generation MAST 250

The **MAST 250** Tower System offers simplicity and safety combined with an increased strength and versatility that ensures regular use across various industry applications.

Fully complying with HD1004 and ISO9002 accreditation the **MAST 250** Tower System is available in both Span (1.45m wide) and Narrow Width (0.85m wide) options.

With each option available in three platform lengths (1.5m, 2.5m and 3.2m) there is a tower available for every application.

## features & benefits

- Ensures quick assembly.
- Conical head spigot.
- Simple assembly - no more incorrectly positioned ladder frames.
- Greater choice in platform heights providing pin point access to the work area.
- Guaranteed guardrail positioning at any chosen platform level.
- One-piece folding toeboards.
- No need to stock clip-on ladders or ladder frames - one frame does it all.
- Non-slip deck provides a safe, highly durable working area.
- 250mm rung spacing.
- Available in various platform lengths and frame sizes.

In an increasing need for safe low level access **MAST 250** has been specifically designed to create handrails at the correct levels in difficult access areas...

### new 7 rung frames available

Selected **MAST 250** frames are available in 250mm increments to meet all height requirements particularly in restricted and under soffit applications. 250mm rung flexibility ensures maximum handrail safety to the working platform.

#### safe

Manufactured to the highest international standards.

Safe access to the working platform - everytime!

Connecting frame to frame is safer and quicker with the conical head spigot.

All frame rungs with non-slip serrated finish.

#### economical

Guaranteed value for money.

Long term strength and durability.

#### fast

Easy to erect and dismantle.

Fully climbable frames without need for specialist Ladder Frames.

All components locate quickly without unnecessary clips and pins.

#### easy

Various add on components available.

With unlimited versatility, Mast 250 can be adapted to suit more specialised needs.

Greater choice in platform heights.
