# Generation readylok

The scaffolders mobile transom

**Generation Readylok** scaffold units will, at low cost immediately convert your stock of tube and fittings into an easily and speedily erected system scaffold.

The use of these pre-coupled units eliminate the need for loose fittings dramatically.

In use they will considerably speed erection times reducing labour cost and site losses.

**Generation Readylok** transoms are made to predetermined sizes, fully plated, with preset vertical and horizontal couplers to enable standards and ledgers to be perfectly positioned. This saves a considerable time in measuring and setting out. The result is a fast and fool proof system with its own, high, built in safety factor.

In properly tied structures ledger bracing can be eliminated to provide free walk through on all lifts satisfying client request and saving both labour and material at the same time.

**Generation Readylok** transom units are available for hire and sale in 5 board units., and available in 4 and 3 boards sizes by special order.
